Muhammad Sultan Khalid

Frontend Developer (React)

Lahore, Pakistan · 0348-0719674 · Sultankhalid1007@gmail.com
Portfolio: skportfolio-sigma.vercel.app · GitHub: github.com/Sk7440 · LinkedIn: linkedin.com/in/sultan-khalid-203841284

SUMMARY

Frontend developer who builds responsive web apps in React, JavaScript and Tailwind CSS. Four projects deployed on Vercel, including a role-based task manager and a tour booking app (React Router, Context API), plus a full-stack AI chat app built with Next.js and TypeScript. Studying Computer Science at Virtual University of Pakistan. Seeking a junior React developer or frontend internship role in Lahore.

TECHNICAL SKILLS

Frontend: React (hooks, Context API, React Router), Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3 (Flexbox, Grid)
Styling & animation: Tailwind CSS, shadcn/ui, responsive design, GSAP, Framer Motion
Tooling: Vite, Git, GitHub, ESLint, Vercel
Data: REST APIs, JSON, localStorage
Also familiar with: Python, FastAPI (basics) · currently learning Node.js and Express

PROJECTS

TaskSpace — Role-Based Task Management App

Live · Code

React · Context API · Tailwind CSS · Vite

- Built separate Admin and Employee dashboards with role-based login and protected views.
- Admins create and assign tasks with priority, due date and description, and track team task metrics.
- Employees see their assigned tasks and mark them complete; auth and task state shared through a Context API provider.
- Data and login sessions persist in localStorage, with mock users and tasks seeded on first launch.

Wander-Lust — Tour Booking App

Live · Code

React 19 · React Router · Context API · Tailwind CSS · Vite

- Built a single-page tour booking app with client-side routing (React Router) between tour listings and booking views.
- Shared booking and reservation state across components with the Context API.
- Built a booking modal that recalculates the price live as the user changes options, with form validation before submit.

AI Chat Assistant — Full Stack

Code

Next.js · React 19 · TypeScript · Tailwind CSS · shadcn/ui · FastAPI · Docker

- Chat app that runs local models through Ollama and falls back to cloud AI providers (Anthropic, OpenAI, Gemini) when no local model is available.
- Model picker with Auto, Local and Cloud modes; Markdown rendering of replies; chat history kept in the browser.
- Next.js and TypeScript frontend talking to a Python FastAPI backend, run together with Docker Compose.

Spendly — Personal Finance Dashboard

Live · Code

JavaScript (ES6+) · Tailwind CSS · GSAP · Anime.js

- Add, edit and delete income and expense entries, with balance, income and expense totals updating instantly.
- Filter transactions by type; data persists across sessions in localStorage.
- Scroll and text animations with GSAP (ScrollTrigger, SplitText) and Anime.js; responsive dark theme.

EDUCATION & TRAINING

Associate Degree in Computer Science — Virtual University of Pakistan 2026 – 2028 (in progress)
Applied AI Course — Corvit Networks
Certifications: JavaScript (HackerRank) · Responsive Web Design (freeCodeCamp)
